

VIVEKANAND K

DATA ENGINEER | +91 9901455516 | [Linkedin](#) | [Github](#) | vkhiremath368@gmail.com

SUMMARY

- Data Engineer with 3 years of experience in Data Pipeline development including design and maintenance for efficient data flow from various sources to target systems.
- Experienced in developing Extract, Transform, Load (ETL) processes to prepare data for analysis and reporting to stakeholders and supporting decision-making.
- Skilled in Big Data systems, ETL processes and data modelling to ensure data accuracy, streamline workflows, and improve processing efficiency in cloud environments.
- Adept at collaborating in Agile environments with cross-functional teams to understand needs and maintain documentation for data processes and systems.

SKILLS

- **Programming:** Python, C++, Linux Shell Scripting, SQL, Pyspark
- **Data Warehouses:** Hive, AWS Redshift, Snowflake
- **Distributed Computation Frameworks:** Apache Hadoop, Apache Spark
- **AWS Services:** S3, EMR, Lambda, CloudWatch, DynamoDB, Redshift, Glue, SNS, SQS, StepFunction
- **Databases and Visualization Tools:** MySQL, Pentaho DI, Informatica, QlikSense

WORK EXPERIENCE

Data Engineer

Cognizant Technology Solutions – Hyderabad, India

Sep 2021 – Jul 2024

➤ Incremental Ingestion pipeline – FP&A Finance

- Leveraged the **Hadoop** ecosystem on **AWS EMR** to process over 2TB of financial data weekly, ensuring high availability and scalability.
- Designed and implemented **ETL** pipelines using **AWS Glue**, reducing data processing times by 30% and improving reporting speed by 40%.
- Utilized **PySpark** for distributed data processing, generating over 200 key performance indicators (KPIs) that contributed to a 15% increase in operational efficiency.
- Optimized **SQL** queries to derive critical insights, reducing execution times by 25% and enhancing overall data accessibility for stakeholders.
- Implemented automated monitoring solutions for data pipelines, cutting downtime by 50% and decreasing manual intervention by 70%, leading to significant reliability improvements.

➤ Data Pipeline Migration – HR Domain

- Migrated 6+ HR systems and associated pipelines to AWS, processing over 300,000 employee records daily and achieving 99.99% uptime with zero data loss during the transition.
- Reduced data processing time by 80% through AWS Glue and Apache Spark, while implementing automated validation checks that decreased average monthly data errors by 40%.
- Deployed solutions via automated CI/CD processes to execute data pipelines running in batch.

Skills Used: Python, Airflow, AWS, Redshift, Glue, S3, ETL, Data Validation, Data Integration, SQL, Pentaho DI, Git

PROJECTS

Airlines Data Ingestion Pipeline Project | *Python, AWS, Data Ingestion, ETL*

- An effective data ingestion pipeline for airlines using AWS enables seamless collection, processing, and storage of flight data, enhancing operational efficiency and decision-making capabilities.

EDUCATION

Bachelor of Engineering (ECE)

Acharya Institute of Technology, Bangalore, India. **GPA: 8.18/10**

August 2017 - July 2021

CERTIFICATION

- Snowflake Hands on Essentials (DWW, CM-CEW, DABW, DLW, DEW) [[Certificate](#) [Credentials](#)]
- Academy Accreditation - Databricks Fundamentals [[Certificate](#) [Credentials](#)]
